Telehealth Edu Application Manual:

1. Home URL: <https://master.dca8ah9z51n5k.amplifyapp.com/>
 - a. Sign In View: <https://master.dca8ah9z51n5k.amplifyapp.com/signin.html>
 - b. Sign Up View: <https://master.dca8ah9z51n5k.amplifyapp.com/register.html>
 - c. Verification View: <https://master.dca8ah9z51n5k.amplifyapp.com/verify.html>
 - d. Video View: <https://master.dca8ah9z51n5k.amplifyapp.com/video.html>
2. After visiting the Home URL, the user can click 'Sign Up' to be redirected to the sign up view. They will enter their email address, password and confirm their password. Password validation requires at least one uppercase, one lowercase, one number and one symbol. They will then be prompted to the verification screen where they will input their email address and the code that was sent to their email. Then once validated they will be redirected to the video view. The default video will be displayed and playable. The user can then search up other videos by inputting into the text box under 'Search for Video' including 'What is Telehealth?', 'Is Telemedicine The Future Of Health Care?', 'Telehealth' and finally the default video again 'SimplePractice: Telehealth Set Up and Best Practices' (exclude quotes when searching). Click the search button to execute the video search. The right side will populate with the video URL searches which allows the user to reference and search any of them again by name if so desired.
3. A returning user may click the 'Sign In' button to sign in with their preexisting credentials to then be redirected to the video screen to watch and browse videos as mentioned in the above step.
